

## Use

GLD11 is my company imported advanced technology to develop the most reliable performance of small volume, load breakers switch suitable for air-conditioning and ventilation system, water pump, suitable for industrial equipment, safety switch and used as insulation switches, equivalent to isolate KG20 overseas distribution circuit breaker KG100 - type load switch.

## Normal working condition

1. Air temperature is not around, and its  $+40^{\circ}\text{C}$ , than the average temperature within 24h not exceed  $+35^{\circ}\text{C}$ ;
2. Around the upper air temperature is not exceed  $-5^{\circ}\text{C}$ ;
3. Install the location at an altitude of not more than 2000m;
4. The highest temperature for  $+40^{\circ}\text{C}$ , the air, no more than 50% of relative humidity in low temperature can allow the relative humidity is high, such as 90%  $20^{\circ}\text{C}$  to 90%.when due to temperature change. Occasionally produces ion should adopt special measures.

## The product model and its meaning

## Features

### Safety

The switch from the insulation disconnection contacts, reached  $13 \times 14\text{mm}$  VDE0113. Considerably more than the security requirements, in many cases, switch security level than the world existing electric block.

### Flexible installation type

Switch suitable panel and can be used, installation, and base type can easily installed base and safely use screws or 35mm rail system installation, most strong flexibility and adaptability, additional contactor and neutral terminals may not remove switch and easily to increase the additional contactor.

### Convenient installation

Built-in screws can prevent manual operation sliding, pneumatic or power tools, ensure the best performance play during the installation and speed.

### The main technical parameters

Using category		IEC/BS/VDE Rated nominal value						
Current or power	Hot currents Lth	Interaction load Ac21	Ac23 Accidentally switched motor or high inductance load				Ac3 Direct online start motor	
			3*220-240v	3*380-440v	3*220-240v	3*380-440v		
GLD11-25	25A	25A	4KW	7.5KW	3KW	5.5KW		
GLD11-32	32A	32A	5.5KW	11KW	4KW	7.5KW		
GLD11-40	40A	40A	7.5KW	15KW	7.5KW	11KW		
GLD11-63	63A	63A	11KW	22KW	11KW	12.5KW		
GLD11-80	80A	80A	18.5KW	30KW	15KW	22KW		
GLD11-100	100A	100A	22KW	37KW	18.5KW	30KW		

Note: 1. With adjustable axis, the length of 200mm in axis

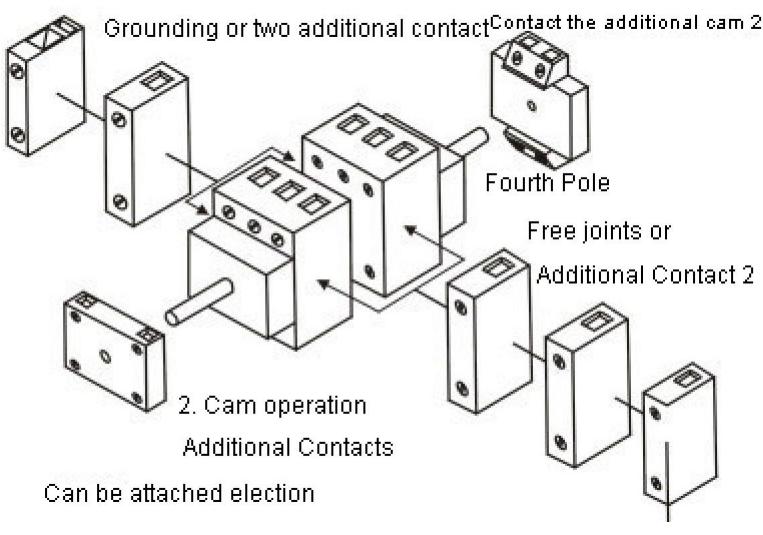

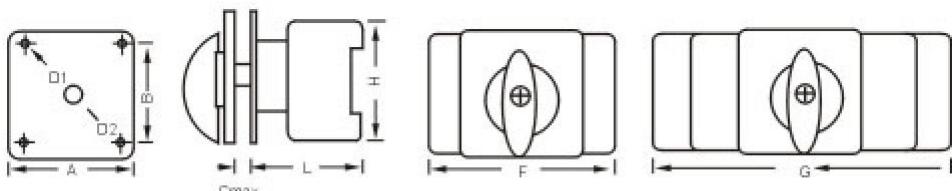

2. This type with the ground.

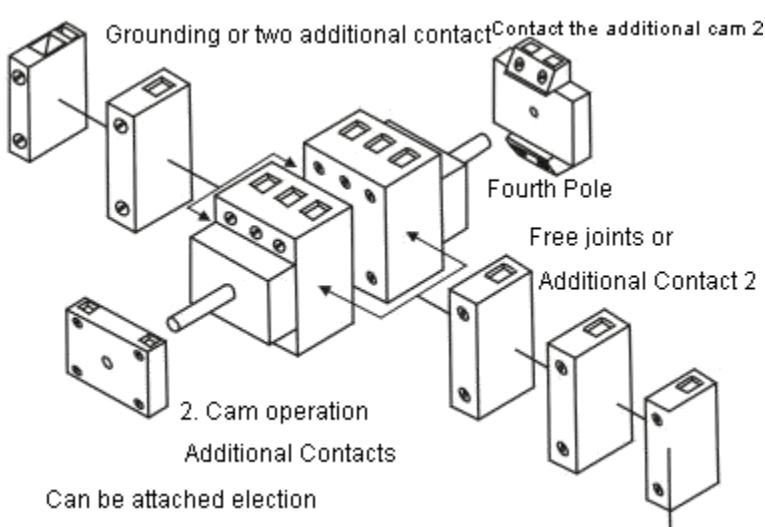

3. P, N - a neutral grounding terminals, E

4. Above all types of free optional accessories, lateral installation additional contacts, top mounted additional contacts, active, handle, door padlock interlock, etc
