

HCL & HCS Side Rocker-type Test Stand

ITEM NO.:HCL-500

HCS-500

Side rocker-type test bench is designed for domestic and international force gauges, can be combined into different usage test machines, for a variety of plug power, push, destruction test and other tests. Force values are displayed at the same time, you can also add a digital display ruler to display its displacement trip.

Main Characteristics

1. Stable base, handwheel overload, easy operation, suitable for use at indoor tables;
2. The base equipped with mobile platforms, so it is convenient to fix clamps.
3. Maximum measurable space: $\leq 245\text{mm}$
4. Rated load: 500N
5. Dimension: $350 \times 265 \times 490$
6. Stroke: $\leq 250\text{mm}$
7. Net weight: 22kg
8. Display accuracy of the scale: 0.01mm

Remark: This product without Pull Force gauge

HM - 1 k manual horizontal test bench

ITEM NO.:HM-1K

HM - 1 k manual horizontal test bench is designed for all domestic and international series force gauges, this machine equipped with tools and fixtures and applies to all industries and research institutes in tension and compression, horizontal Strip, uneven load, destruction test and so on. This rack can be used in all kinds of work surface, with features of simple manual operation, stability, etc.

Main Characteristics

1. Dimension: $450 \times 100 \times 160\text{mm}$
2. Rated load: 1000N
3. Stroke: $\leq 100\text{mm}$
4. Weight: 9kg

Remark: This product without Pull Force gauge
