

## HDD Electric double-column vertical machine for force gauge

HDD Electric double-column vertical machine is designed for force gauges both at home and abroad. this product uses the double Guide-bar structure, has the advantages of good stability, wide application, easy to use. And with the functions of electrodeless high speed and manual, automatic, turnaround times, the time can be set. Can be used in conjunction with our digital force gauge achieve snap the stop, hold, imposed power restriction, fatigue tests and many other useful features.

### Main Characteristics

1. Nixie tube display;
2. Time and Count the Round-trip test.
3. Dimension: 405×270×1220mm
4. Testing speed: 0~500mm/min
5. Rated load: 1000N/2000N/5000N
6. Maximum effective space: ≤600mm
7. Stroke: ≤225mm
8. Weight: 56kg

ITEM NO.:HDD

Patent NO.:ZL201120396378.X  
ZL201230277872.4

Remark:Applied with our Push Pull Gauge for Stop when pull off,Force maintenance and fatigue test,etc.
